DATA PROCESSING

in business and industry

VOLUME 2

List of contents and subject index for 1960

The List of Contents gives the page numbers, titles and synopses of all articles published during 1960. An item in the Subject Index is cross-referenced to the List of Contents by the page number in which the reference appears. For example, the item "Amount and account number printer" is stated in the Subject Index to appear on page 160; reference to the List of Contents reveals that page 160 is in the article, "Automatic banking—machines specifically developed for banking work—magnetic character printing and reading equipment".

A QUARTERLY FOR TOP MANAGEMENT AND CHIEF EXECUTIVES

CONTENTS FOR 1960

Number 1 January-March

2 **Recording data at the point of sale**
three data recording units that can be fitted retrospectively to standard cash registers

10 **The Norwich City Council computer**
why Norwich chose a computer—the jobs performed and the savings made

20 **Letter writing by numbers**
automatic machine that types over 120 individually composed letters a day

26 **Gamma 60**
new concepts in computer design and operation

32 **Punched paper tape**
what it is, how it is used, future developments

42 **Controlling continuous processes by computer**
the advantages to be gained and the various methods of employing a computer for this work

48 **Two scientific-management techniques**
the Monte Carlo method and linear programming illustrated by simple examples

54 **The KDP 10**
English Electric's new commercial data processing system designed to utilize the high data input and output speeds possible with magnetic tape

58 **Mechanized accounting for the smaller office**
a simple machine system that can be operated by any competent typist

Number 2 April-June

66 **Automatic preparation of commercial documents**
electric typewriters, adding machines, paper-tape punches and paper-tape readers linked together in a single data processing system

74 **Ordering, invoicing, stock control**
punched-card machines and a plugged-programme computer used by a car manufacturer to prepare all the documents needed for the control and supply of spare parts

84 **Electrostatic printing**
a new method of reproducing graphic data quickly

90 **IBM computers**
the story of their development

102 **Analysing business data**
an accounting machine equipped with 198 totalling registers

110 **Edge-punched card tabulator**
a machine that punches and reads data recorded in the central area of a conventional edge-punched card

114 **Orion**
a new time-shared computer. How a time-shared machine operates and the way in which it can be used

122 **From punched cards to computer**
—a practical approach. A small computer employed on commercial work

Number 3 July-September

130 **Current accounts on a computer**
performing the routine book-keeping work of branch banks

138 **Kimball tags**
eliminate the need for subsequent manual data transcription. Tags are used as sales tickets, travel tickets and as stock and production control tickets

150 **Collectadata**
novel data transmission system which links all departments with a data processing centre

156 **Automatic banking**
machines specifically developed for banking work—magnetic character printing and reading equipment

170 **Capturing commercial data at source**
a simple mechanical system for acquiring transaction information and transcribing it on to punched tape, punched cards or magnetic tape

176 **Selective addressing**
automatically selecting and printing addresses from a file of unsorted address master cards

183 **Controlling city traffic by computer**

184 **Reading machines**
development and application of Farrington print readers

186 **Data processing topics**
comments on new equipment and fresh applications

188 **Administration of group pension schemes by computer**
an insurance company hires time on a computer to up-date records and produce actuarial statistics

Number 4 October-December

196 **Preparing sales quotations promptly**
how two operators with Flexowriters now produce all the documents formerly prepared by five typists

204 **Electronic record-keeping**
an inexpensive machine for the smaller business that can keep track of 5,000 stock records

208 **Machine reading**
a survey of the printed codes that can be read directly by both men and machines

224 Thermoplastic recording

a new method of storing vast quantities of information on a single plastic tape—a technique of the future!

230 Automatically up-dating account records without a computer

a description of a fully automatic version of a standard keyboard accounting machine

238 Branch bank accounting

how the Chartered Bank use two of the new generation of electronically operated keyboard accounting machines to up-date current account records

246 Data processing topics

comments on new equipment and important applications

248 I.C.T.'s new computer—the 1301

254 Management accounting by digital computer

a technique that enables an engineering company to maintain tighter control over the production operations of two factories

SUBJECT INDEX
